

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PHILOSOPHICAL
TRANSACTIONS,
OF THE
ROYAL SOCIETY
OF
L O N D O N.

VOL. LXXVIII. For the Year 1788.

P A R T I.

L O N D O N,

SOLD BY LOCKYER DAVIS, AND PETER ELMSLY,
PRINTERS TO THE ROYAL SOCIETY.

MDCCCLXXXVIII.

A D V E R T I S E M E N T.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions*, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume: the Society, as a Body, never interesting themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable, that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such, as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.

C O N T E N T S

O F

V O L. LXXVIII. P A R T I.

- I. *OF the Methods of manifesting the Presence, and ascertaining the Quality, of small Quantities of Natural or Artificial Electricity.* By Mr. Tiberius Cavallo, F. R. S. Page 1
- II. *The Croonian Lecture on Muscular Motion.* By George Fordyce, M. D. F. R. S. P. 23
- III. *An Account of a Mass of native Iron, found in South-America.* By Don Michael Rubin de Celis. Communicated by Sir Joseph Banks, Bart. P. R. S. P. 37
- IV. FRIGORIFIC EXPERIMENTS ON THE MECHANICAL EXPANSION OF AIR, *explaining the Cause of the great Degree of Cold on the Summits of high Mountains, the sudden Condensation of aerial Vapour, and of the perpetual Mutability of atmospheric Heat.* By Erasmus Darwin, M. D. F. R. S.; communicated by the Right Honourable Charles Greville, F. R. S. P. 43
- V. *Some Observations on the Heat of Wells and Springs in the Island of Jamaica, and on the Temperature of the Earth below the Surface in different Climates.* By John Hunter, M. D. F. R. S.; communicated by the Hon. Henry Cavendish, F. R. S. P. 53

- VI. *A Table of the mean Heat of every Month for Ten Years in London, from 1763 to 1772 inclusively.* By William Heberden, M. D. F. R. S. and A. S. p. 66
- VII. *On Centripetal Forces.* By Edward Waring, M. D. F. R. S. Professor of Mathematics at Cambridge. p. 67
- VIII. *Experiments on local Heat. In a Letter from James Six, Esq. to the Rev. Francis Wollaston, LL.B. F. R. S.* p. 103
- IX. *Observations on the Manner in which Glass is charged with the electric Fluid, and discharged.* By Edward Whitaker Gray, M. D. F. R. S. p. 121
- X. *Experiments on the cooling of Water below its freezing Point.* By Charles Blagden, M. D. Sec. R. S. and F. A. S. p. 125
- XI. *Experiments and Observations relating to the Principle of Acidity, the Composition of Water, and Phlogiston.* By Joseph Priestley, LL.D. F. R. S. p. 147
- XII. *Some Observations on the Irritability of Vegetables.* By James Edward Smith, M. D. F. R. S. p. 158
- XIII. *An Account of Experiments made by Mr. JOHN M^c NAB, at Albany Fort, Hudson's Bay, relative to the Freezing of Nitrous and Vitriolic Acids.* By Henry Cavendish, Esq. F. R. S. and A. S. p. 166

A P P E N D I X.

- Translation of Don Michael Rubin de Celis's Letter to the Royal Society, relative to a Mass of native Iron, found in South-America.* p. 183
- A Meteorological Journal kept at the Apartments of the Royal Society, by Order of the President and Council.* p. 191

THE PRESIDENT and COUNCIL of the ROYAL SOCIETY
adjudged, for the Year 1787, the Medal on Sir GODFREY
COPLEY's Donation, to JOHN HUNTER, Esq. F. R. S. for
three Papers which were printed in the last Volume of the
Philosophical Transactions.

- XIV. *O*BSERVATIONS on the Natural History of the Cuckoo. By Mr. Edward Jenner. In a Letter to John Hunter, Esq. F. R. S. Page 219
- XV. Of the Temperament of those musical Instruments, in which the Tones, Keys, or Frets, are fixed, as in the Harpsichord, Organ, Guitar, &c. By Mr. Tiberius Cavallo, F. R. S. p. 238
- XVI. Description of a new Electrical Instrument capable of collecting together a diffused or little condensed Quantity of Electricity. By Mr. Tiberius Cavallo, F. R. S. p. 255
- XVII. On the Conversion of a Mixture of dephlogisticated and phlogisticated Air into nitrous Acid, by the electric Spark. By Henry Cavendish, Esq. F. R. S. and A. S. p. 261
- XVIII. Experiments on the Effect of various Substances in lowering the Point of Congelation in Water. By Charles Blagden, M. D. Sec. R. S. and F. A. S. p. 277
- XIX. Additional Experiments and Observations relating to the Principle of Acidity, the Decomposition of Water, and Phlogiston. By Joseph Priestley, LL.D. F. R. S. With Letters to him on the Subject, by Dr. Withering, and James Keir, Esq. p. 313
- XX. On the Probabilities of Survivorships between Two Persons of any given Ages, and the Method of determining the Values of Reversions depending on those Survivorships. By Mr. William

- liam Morgan; *communicated by the Rev. Richard Price, D. D. F. R. S.* p. 331
- XXI. *An Account of a remarkable Transposition of the Viscera.* By Matthew Baillie, M. D. *In a Letter to John Hunter, Esq. F. R. S.* p. 350
- XXII. *On the Georgian Planet and its Satellites.* By William Herschel, LL.D. F. R. S. p. 364
- XXIII. *Experiments on the Formation of Volatile Alkali, and on the Affinities of the Phlogisticated and light Inflammable Airs.* By William Austin, M. D. *Fellow of the College of Physicians; communicated by Charles Blagden, M. D. Sec. R. S.* p. 379
- XXIV. *Some Properties of the Sum of the Divisors of Numbers.* By Edward Waring, M. D. F. R. S. p. 388
- XXV. *Experiments on the Production of artificial Cold.* By Mr. Richard Walker, *Apothecary to the Radcliffe Infirmary at Oxford. In a Letter to Henry Cavendish, Esq. F.R.S. and A.S.* p. 395
- XXVI. *A Description of an Instrument which, by the turning of a Winch, produces the Two States of Electricity without Friction or Communication with the Earth. In a Letter from Mr. William Nicholson to Sir Joseph Banks, Bart. P. R. S.* p. 403
- XXVII. *Abstract of a Register of the Barometer, Thermometer, and Rain at Lyndon in Rutland, with the Rain in Hampshire and Surrey, in 1787. Also some Account of the Annual Growth of Trees.* By Thomas Barker, Esq. *Communicated by Thomas White, Esq. F.R.S.* p. 408
- XXVIII. *On the Era of the Mabometans, called the Hejerd (هجرة),* By William Marsden, Esq. F. R. S. and A. S. p. 414
